When combined with light-colored design elements, such as [white subway tiles](#), the atmosphere of the bathroom becomes pleasantly light and airy. For smaller bathrooms, this combination is a real winner as it gives a more spacious appearance.

Walk-in shower designs without doors add openness by creating continuity throughout the bathroom. Keeping the shower floor level with the bathroom floor, as pictured here, is a smart way to integrate the shower area with the rest of the room, as well as eliminating the possibility of tripping over a ledge when stepping out of the shower!
