

# ARIZONA TILE

# CREMA MARFIL

## STONE TYPE

Marble

## ORIGIN

Spain

## STOCKED FINISH

Polished

## GEOLOGICAL ERA

Jurassic  
(144-206 million years ago)

## STOCKED SIZES

3/4" (2cm slab)  
1-1/4" (3cm slab)

## RECOMMENDED USES

Commercial  
Residential  
Interior Floor  
Countertops  
Interior Wall  
Fireplaces

Crema Marfil is quarried from a bedrock quarry in a mountain range near Novelda, Spain. Characteristically, Crema Marfil has less veining and a clearer background color, while Crema Marfil Classic visibly has more veins and fill. Since Crema Marfil is a marble, it is softer and may be susceptible to scratching or abrasion. It is a common characteristic for this stone to have voids in the raw material. Before it reaches the polishing stages, these voids are filled with a polyester resin. Depending on how deep the void is, the resin may shrink as it dries, leaving the surface of the filled area slightly lower than the rest. This does not affect the durability, maintenance or beauty of the stone. As a natural stone product, it is recommended that it be sealed to extend its longevity.
