Fantasy Blue Satin is a marble from northern India. Fantasy Blue Satin is such a hard marble, that it needs to be cut using a granite gang saw instead of a marble gang saw. Due to its hardness, it is well suited for kitchen countertop use. This marble can have diagonal or linear movement depending on the block. The beige and white veining dispersed across a blue background give this marble a dramatic look. The creamy veining adds to this effect. During the brushing process, an epoxy resin is applied to the surface of the stone to fill in any natural pits, cracks or fissures that may exist. This does not affect the durability, maintenance or beauty of the stone. It is possible for some of the more minute pits that are too small to effectively hold the resin, to reopen during other finishing stages. However, this will not detract from the overall quality or appearance of the stone. Due to the qualities of the stone, the slabs are book-matched, meaning slab one and slab two will be cut and brushed to create a mirror image of each other. These are then kept in sequence, which allows for a consistent flow in pattern. A mesh backing is adhered to the back of the stone to ensure safety while handling and fabricating the slab. As a natural stone product, it is recommended that this be sealed to extend its longevity.
