

ARIZONA TILE

GALAXY BLACK

STONE TYPE

Granite

GEOLOGICAL ERA

Proterozoic
(544-2500 million years ago)

FINISH

Polished

RECOMMENDED USES

Commercial
Residential
Interior Floor
Interior Wall

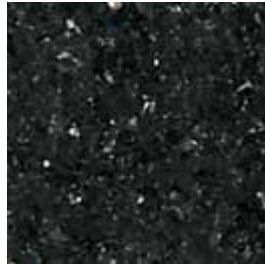

ORIGIN

Andhra Pradesh, India

Countertops
Exterior Floor
Exterior Cladding
Fireplaces
Showers

SIZES

12"x12"x3/8"
3/4" (2cm slab)
1-1/4" (3cm slab)

Galaxy Black is quarried from a boulder quarry located near the town of Markapur, in the state of Andhra Pradesh, India. The size and color of each block is fairly consistent between shipments. Arizona Tile focuses its purchases on the slabs with medium-sized gold flecks. It is possible to have some slight veining in this color, or consolidation of the gold flecks. Because it is such a dense stone, and there are minimal micro fissures and pitting, no resin is applied to the surface. Piece to piece variation in shade or color are inherent in all natural stone products; therefore, when installing natural stone tile, it is recommended to mix tiles from several boxes at a time during installation to achieve the best range of color. As a natural stone product it is recommended that it be sealed to extend its longevity.

This granite is also known as Amethyst Black, Black Galaxy, Black Star Galaxy, or Midnight Magic.
