GOBI

PRODUCT TYPE

Limestone

ORIGIN

Turkey

STOCKED FINISH

Honed

RECOMMENDED USES

Commercial

Residential

Interior Floor

Exterior Floor

Exterior Cladding

Fireplaces

Shower Walls

STOCKED SIZES

12 x 24 x 3/8

3/4" (2cm slab)

Gobi limestone is quarried from bedrock. This is a sedimentary stone that is formed in shallow seas and is composed mainly of calcite calcium carbonate. Gobi limestone is a fairly uniform product staying consistent from tile to tile and from slab to slab. It is possible for it to have small, brown or black spots randomly in this stone. With a light cream background and slightly darker cream mottling, Gobi limestone has a classic look. It is always recommended to view your tile or slab before installation. Piece to piece variation in shade or color are inherent in all natural stone products; therefore, when installing natural stone tile, it is recommended to mix tiles from several boxes at a time during installation to achieve the best range of color. As a natural stone product it is recommended that it be sealed to extend its longevity.
