

**STONE TYPE**

Granite

ORIGIN

Brazil

FINISH

Polished

RECOMMENDED USES

Commercial & Residential

Interior

Floor & Wall

Countertops

Fireplaces

Tub Surrounds

Vanities

SIZES

3/4" (2cm slab)

1 1/4" (3cm slab)

Alaska is made up of mostly feldspar and quartz. Rust colored veins will appear on some of the slabs due to oxidation over millions of years. During the polishing process, an epoxy resin is applied to the surface of the stone to fill in any natural pits, cracks or fissures that may exist. This does not affect the durability, maintenance or beauty of the stone. It is possible for some of the more minute pits that are too small to effectively hold the resin, to reopen during other finishing stages. However, this will not detract from the overall quality or appearance of the stone. Due to the qualities of the stone, the slabs are book-matched; meaning slab one and slab two will be cut and polished to create a mirror image of each other. These are then kept in sequence, which allows for a consistent flow in pattern.

NSF indicates this product conforms to the requirements of NSF/ANSI Standard 51, thereby meeting the health and sanitation requirements for materials used in areas of food preparation.
