

**STONE TYPE**

Granite

ORIGIN

Bahia, Brazil

FINISH

Polished

GEOLOGICAL ERAArchean-Proterozoic
(544-2500 million years ago)**SIZES**

3/4" (2cm slab)

1-1/4" (3cm slab)

RECOMMENDED USES

Commercial & Residential
Interior & Exterior
Floor & Wall
Countertops
Fireplaces
Tub Surrounds
Vanities

Azul Bahia is a semi-precious stone produced from a bedrock quarry in the state of Bahia, Brazil. The depth of the blue and the veining will vary between blocks. Some slabs will also show a small amount of green hues in the background. The slabs of this granite are book-matched, in which slab one and slab two will be cut and polished to create a mirror image of each other. These are then kept in sequence, which allows for a consistent flow in pattern. During the polishing process, an epoxy resin is applied to the surface of the stone to fill in any natural pits, cracks or fissures that may exist. This does not affect the durability, maintenance or beauty of the stone. It is possible for some of the more minute pits that are too small to effectively hold the resin, to reopen during other finishing stages. However, this will not detract from the overall quality or appearance of the stone. Finally, a mesh backing is adhered to the stone. There will be noticeable variations in color and movement between pieces. Therefore, it is important and recommended that a range of this product be viewed before finalizing a purchase. As a natural stone product it is recommended that it be sealed to extend its longevity.

NSF indicates this product conforms to the requirements of NSF/ANSI Standard 51, thereby meeting the health and sanitation requirements for materials used in areas of food preparation.
