

## ARIZONA TILE

## SILVER LENNON

**STONE TYPE**

Granite

**ORIGIN**

Brazil

**FINISH**

Polished

**RECOMMENDED USES**

Commercial  
Residential  
Interior Floor  
Countertops  
Interior Wall  
Fireplaces  
Showers

**SIZES**

3/4" (2cm slab)  
1-1/4" (3cm slab)

Silver Lennon Granite is quarried from a bedrock quarry in Brazil. This granite can vary from block to block. Some blocks will have sweeping veins while other blocks will have a more crystalline structure. Its possible for some slabs to have areas of beige or cream mixed with the silver. During the polishing process, an epoxy resin is applied to the surface of the stone to fill in any natural pits, cracks or fissures that may exist. This does not affect the durability, maintenance or beauty of the stone. It is possible for some of the more minute pits that are too small to effectively hold the resin, to reopen during other finishing stages. However, this will not detract from the overall quality or appearance of the stone. Due to the qualities of the stone, the slabs are book-matched; meaning slab one and slab two will be cut and polished to create a mirror image of each other. These are then kept in sequence, which allows for a consistent flow in pattern. As a natural stone product, it is recommended that it be sealed to extend its longevity.
