ORIGIN

Brazil

FINISH

Satin

RECOMMENDED USES

Commercial & Residential

Interior

Floor & Wall

Backsplashes

Countertops

Fireplaces

Tub Surrounds & Showers

Vanities

SIZES

3/4" (2cm slab)

1-1/4" (3cm slab)

St. Cecilia White Satin is quarried from a bedrock quarry in Brazil. It is quarried from the lower levels of the Juparana St. Cecilia quarry, which is gold in color due to millions of years of oxidation. With depth, in this quarry, the granite color appears more white in tone. During the polishing process, an epoxy resin is applied to the surface of the stone to fill in any natural pits, cracks or fissures that may exist. This does not affect the durability, maintenance or beauty of the stone. It is possible for some of the more minute pits, that are too small to effectively hold the resin, to reopen during other finishing stages. However, this will not detract from the overall quality or appearance of the stone. There will be noticeable variations in veining and movement between pieces. As a natural stone product, it is recommended that it be sealed to extend its longevity.

NSF indicates this product conforms to the requirements of NSF/ANSI Standard 51, thereby meeting the health and sanitation requirements for materials used in a Splash Zone, effective December 9, 2009.

Product selection varies at each location. Please contact your local Arizona Tile for product availability.
