

ARIZONA TILE

THUNDER FUSION

**STONE TYPE**

Granite

ORIGIN

India

FINISH

Polished

RECOMMENDED USES

Commercial

Residential

Interior Floor

Countertops

Interior Wall

Fireplaces

Showers

SIZES

3/4" (2cm slab)

1-1/4" (3cm slab)

Thunder Fusion is quarried from a bedrock quarry in India. This granite has a creamy, white background with a light, burgundy brush stroke movement and may have gold veining due to oxidation that occurred millions of years ago. During the polishing process, an epoxy resin is applied to the surface of the stone to fill in any natural pits, cracks or fissures that may exist. It is possible for some of the more minute pits that are too small to effectively hold the resin, to reopen during other finishing stages. However, this does not affect the durability, maintenance, or beauty of the stone. Due to the qualities of the stone, the slabs are book-matched; meaning slab one and slab two will be cut and polished to create a mirror image of each other. These are then kept in sequence, which allows for a consistent flow pattern. Finally, a mesh backing is adhered to the back of the stone to ensure safety while handling and fabricating the slab. As a natural stone product, it is recommended that it be sealed to extend its longevity.
