WHITE WAVE

**STONE TYPE**

Granite

ORIGIN

Fujian Province, China

FINISH

Polished

GEOLOGICAL ERAProterozoic
(544-2500 million years ago)**SIZES**3/4" (2cm slab)
1-1/4" (3cm slab)**RECOMMENDED USES**Commercial & Residential
Interior
Floor & Wall
Countertops
Fireplaces
Tub Surrounds & Showers
Vanities

White Wave is quarried in a bedrock quarry in the Fujian Province of China. It is cut using the conventional drilling of benches and then cutting them into block form. This granite is uniform in its structure and excellent for residential as well as commercial projects due to the high volume of blocks that are able to be quarried each month. During the polishing process, an epoxy resin is applied to the surface of the stone to fill in any natural pits, cracks or fissures that may exist. This does not affect the durability, maintenance or beauty of the stone. It is possible for some of the more minute pits, that are too small to effectively hold the resin, to reopen during other finishing stages. However, this will not detract from the overall quality or appearance of the stone.

NSF indicates this product conforms to the requirements of NSF/ANSI Standard 51, thereby meeting the health and sanitation requirements for materials used in a Splash Zone, effective December 9, 2009.

Product selection varies at each location. Please contact your local Arizona Tile for product availability.
