

STONE TYPE

Limestone

ORIGIN

Mexico

FINISH

Honed

RECOMMENDED USES

Commercial

Residential

Interior Floor

Countertops

Interior Wall

Exterior Cladding

Fireplaces

Showers

SIZES

3/4" (2cm slab)

16 × 24 × 3/8

12 × 12 × 3/8

18 × 18 × 3/8

Crema Vosscione limestone is quarried from a bedrock quarry in Mexico. This is a sedimentary stone that is formed in shallow seas and is composed mainly of calcite calcium carbonate. One of the unique characteristics of this limestone is the existence of some small shells and fossils that may appear throughout the slab. This limestone will have veining and movement and will range from shipment to shipment. Crema Vosscione is also stocked in the Brushed Lyon 4 piece pattern. Crema Vosscione is on the more dense end of the spectrum for limestones. This material is durable enough to use both interior and exterior and in wet areas. Due to the qualities of the stone, the slabs are book-matched; meaning slab one and slab two will be cut and polished to create a mirror image of each other. These are then kept in sequence, which allows for a consistent flow in pattern. There can be noticeable variances between pieces, so it is important and recommended that a range of this product be viewed before finalizing a purchase. As a natural stone product it is recommended that it be sealed to extend its longevity.
