

**STONE TYPE**

Limestone

**ORIGIN**

El Sheikh Fadl, Egypt

**FINISH**

Honed

**RECOMMENDED USES**

Commercial &amp; Residential

Interior &amp; Exterior

Floor &amp; Wall

Countertops

Fireplaces

Tub Surrounds

Vanities

**SIZES**

3/4" (2cm slab)

1-1/4" (3cm slab)

12"×12"×3/8"

18"×18"×1/2"

Giallo Paillanti is quarried from a bedrock quarry in El Sheikh Fadl, Egypt, which is located just 100 miles south of Cairo. This is a sedimentary stone that is formed in shallow seas and is composed mainly of calcite calcium carbonate. There will be noticeable variations in color and movement between pieces. Therefore, it is important and recommended that a range of this product be viewed before finalizing a purchase. During the finishing process, a colored resin is applied to the surface of the stone to fill in any natural pits, cracks or fissures that may exist. This does not affect the durability, maintenance or beauty of the stone. It is possible for some of the more minute pits that are too small to effectively hold the resin, to reopen during other finishing stages. However, this will not detract from the overall quality or appearance of the stone. As a natural stone product it is recommended that it be sealed to extend its longevity.

NSF indicates this product conforms to the requirements of NSF/ANSI Standard 51, thereby meeting the health and sanitation requirements for materials used in areas of food preparation.
