

# ARIZONA TILE

# JURA BEIGE

## STONE TYPE

Limestone

## ORIGIN

Eichstatt, Germany

## FINISH

Honed

## GEOLOGICAL ERA

Jurassic  
(144-206 million years ago)

## SIZES

3/4" (2cm slab)  
12 × 24 × 3/8

## RECOMMENDED USES

Commercial  
Residential  
Interior Floor  
Interior Wall  
Countertops  
Fireplaces  
\*Showers

\*When installed in interior wet areas, the product must be sealed and maintained properly. If it is not, the appearance of the product could be altered. Please contact your installer or sales representative for more information.

Jura Beige is quarried from a 25-layer bedrock quarry in Eichstatt, Germany. Each of its layers provides a different tone and structure of this particular limestone. Arizona Tile focuses its inventory on one specific layer, due to its consistency and year-round availability. Jura Beige happens to be a very dense limestone, making it suitable for both commercial and residential applications. One of the unique characteristics of this limestone is the existence of large shells and fossils that appear throughout the tile or slabs. Another quality of this material are the quartz veins that can appear throughout the material. These veins are a natural characteristic of the material and are expected to be visible in some pieces of the product. This is a sedimentary stone that is formed in shallow seas and is composed mainly of calcite calcium carbonate. There will be noticeable variations in color and movement between pieces, ranging in color from light beige to dark beige, with a mix of grey. Therefore, it is important and recommended that a range of this product be viewed before finalizing a purchase. Due to the qualities of the stone, the slabs are book-matched; meaning slab one and slab two will be cut and polished to create a mirror image of each other. As with any limestone being used for kitchen tops it's possible to scratch, etch or stain this material so a trivet or cutting board should always be used. It is also important to keep Jura Beige sealed so regular applications of sealer is required when using on a kitchen top. As a natural stone product, it is recommended that it be sealed to extend its longevity.
