Carrara Silver Honed is quarried from a bedrock quarry near Carrara, Italy. Carrara Silver will vary from shipment to shipment. Some blocks will be light silver and consistent in color with no veining while other blocks will have light and dark shades of silver and grey, showing some veining. Due to the qualities of the stone, the slabs are bookmatched; meaning slab one and slab two will be cut and honed to create a mirror image of each other. These are then kept in sequence, which allows for a consistent flow in pattern. As a natural stone product, it is recommended that this be sealed to extend its longevity.
