

**STONE TYPE**

Marble

ORIGIN

Spain

FINISH

Polished

GEOLOGICAL ERA

Jurassic

(144-206 million years ago)

SIZES

3/4" (2cm slab)

1-1/4" (3cm slab)

12x12"x3/8"

18"x18"x3/8"

RECOMMENDED USES

Commercial & Residential

Interior & Exterior

Floor & Wall

Fireplaces

Tub Surrounds

Vanities

Cream Marfil is quarried from a bedrock quarry in a mountain range near Novelda, Spain. Arizona Tile carries two selections of Crema Marfil including Crema Dorado, which is available only in tile. Characteristically, Crema Marfil has less veining and a clear background color, while Crema Dorado visibly, has more veins and fill. Crema Marfil is also a softer stone, and may be susceptible to scratching or abrasion. It is a common characteristic for this stone to have voids in the raw material. Before it reaches the polishing stages, these voids are filled with a polyester resin. Depending on how deep the void is, the resin may shrink as it dries, leaving the surface of the filled area slightly lower than the rest. This does not affect the durability, maintenance or beauty of the stone. Finally, a mesh backing is adhered to the stone. Arizona Tile also offers Crema Marfil as a product in our tumbled program, which will offer a multitude of mosaics and tile sizes that will provide a more unique style to any design.

NSF indicates this product conforms to the requirements of NSF/ANSI Standard 51, thereby meeting the health and sanitation requirements for materials used in areas of food preparation.
