

**PRODUCT TYPE**

Quartzite

ORIGIN

Brazil

STOCKED FINISH

Polished

RECOMMENDED USES

Commercial
Residential
Interior Floor
Countertops
Interior Wall
Fireplaces
Showers
Shower Floors

STOCKED SIZES

3/4" (2cm slab)
1-1/4" (3cm slab)

Greystoke is a quartzite boasting a mixture of warm and cool grey. Its ethereal backdrop is accented by sweeping veining across the surface. Concentrated accents of blue grey add character making it a truly exquisite stone. Over millions of years, water has penetrated deep into this stone through small cracks and fissures, causing the iron and other minerals to oxidize. It is this process that produces the subtle, light gold pencil veining.

An alternative to marble, Greystoke's hard, resilient surface can be used for kitchen countertops without having the scratching and etching issues experienced with marble. During the polishing process, an epoxy resin is applied to the surface of the stone to fill in any natural pits, cracks or fissures that may exist. It is possible for some of the more minute pits that are too small to effectively hold the resin, to reopen during other finishing stages. However, this will not detract from the overall quality or appearance of the stone. Due to the qualities of the stone, the slabs are book-matched, meaning slab one and slab two will be cut and polished to create a mirror image of each other. These are then kept in sequence, which allows for a consistent flow in pattern. Finally, a mesh backing is adhered to the back of the stone to ensure safety while handling and fabricating the slab or tile. As a natural stone product, it is recommended that this be sealed to extend its longevity.
