

**STONE TYPE**

Travertine

ORIGIN

Torreon, Mexico

FINISH

Filled & Honed
Unfilled & Honed

GEOLOGICAL ERA

Quaternary
(2 million years ago-present day)

SIZES**FILLED & HONED**

3/4" (2cm slab)
1-1/4" (3cm slab)

UNFILLED & HONED

12"×12"×3/8"
16"×16"×3/8"
24"×24"×1/2"

RECOMMENDED USES

Commercial & Residential
Interior & Exterior
Floor & Wall
Countertops
Fireplaces
Tub Surrounds & Showers
Vanities

Mexican Noce is quarried near Torreon, Mexico. This is a sedimentary stone that is formed in hot springs and is composed of calcite calcium carbonate. All travertine stones will have natural cavities, or pits visible in the stone that developed when carbon dioxide bubbles became trapped during the formation of the stone. Prior to honing, this travertine is filled with a color cement to fill in these cavities, and due to varying climate conditions, the color of the fill can differ between shipments.

However, the tile for this travertine is produced unfilled, unlike the slabs that are filled. As an unfilled travertine, the pits will remain visible and unfilled until they are filled with grout during installation. Overall, this will provide a more natural aesthetic to the installation of this stone. Arizona Tile also offers unfilled Mexican Noce as a product in our tumbled program, which will offer a multitude of mosaics and tile sizes that will provide a more unique style to any design.

There will be noticeable variations in color and movement between pieces. Therefore, it is important and recommended that a range of this product be viewed before finalizing a purchase. As a natural stone product it is recommended that it be sealed to extend its longevity.
