

ARIZONA TILE

ROCAS AZUL

PRODUCT TYPE

Limestone

ORIGIN

Spain

STOCKED FINISH

Honed

STOCKED SIZES

12 x 24 x 3/8

3/4" (2cm slab)

RECOMMENDED USES

Commercial

Residential

Interior Floor

Countertops

Interior Wall

Fireplaces

*Showers

*When installed in interior wet areas, the product must be sealed and maintained properly. If it is not, the appearance of the product could be altered. Please contact your installer or sales representative for more information.

Rocas Azul is quarried and processed in Spain. This bedrock is just one layer of a large bedrock quarry which supplies twelve different shades which include beige, gold, and tan colors. It is formed in shallow seas and is composed mainly of calcite calcium carbonate. One of the unique characteristics of this limestone is the existence of small shells and fossils that may appear throughout the slabs. This limestone is a very dense stone which makes it an excellent choice for heavy-duty commercial projects. This supplier also has the ability to provide cut-to-size material, making this color a great option for large projects. Piece to piece variation in shade or color are inherent in all natural stone products; therefore, when installing natural stone tile, it is recommended to mix tiles from several boxes at a time during installation to achieve the best range of color. As a natural stone product, it is recommended that this be sealed to extend its longevity. This limestone is also known as Lagos Blue.
