

SEAGRASS

STONE TYPE

Limestone

FINISH

Honed

ORIGIN

Eflani, Karabük, Turkey

SIZES

12"x12"x3/8"

18"x18"x1/2"

3/4" (2cm slab)

1-1/4" (3cm slab)

RECOMMENDED USES

Commercial & Residential

Interior & Exterior

Floor & Wall

Backsplashes

Countertops

Fireplaces

Tub Surrounds & Showers

Vanities

Seagrass is quarried from a bedrock quarry in Eflani, Karabük, Turkey. This is a sedimentary stone that is formed on shallow sea beds from monsoonal rains washing minerals, plants and animals into the sea. It is composed mainly of calcite calcium carbonate. Structurally, Seagrass is a very hard limestone. Some common characteristics that are visible in this limestone are quartz veins, grey portions and many fossilized shells in each piece. There will be noticeable variations in color and movement between pieces. Therefore, it is important and recommended that a range of this product be viewed before finalizing a purchase. Arizona Tile also offers Seagrass as a product in our tumbled program, which will include a multitude of mosaics and tile sizes that will provide a more unique style to any design. As a natural stone product it is recommended that it be sealed to extend its longevity.

NSF indicates this product conforms to the requirements of NSF/ANSI Standard 51, thereby meeting the health and sanitation requirements for materials used in areas of food preparation.

SIZE	PIECES/BOX	SF/BOX	UNITS/PALLET	SF/PALLET
12"x12"x3/8"	10	10	36 boxes	360
18"x18"x1/2"	N/A	N/A	150 pieces	337.5

Standard packaging quantities are noted above, but variances may occur.

Please view actual stone when making your selection, as the images on this page are only representative.
