CS-Bianco Venatino Multi Finish

Hex 2 × 2 Mesh

CS-Bianco Venatino Honed Picket Mesh

Bianco Venatino is a crisp white marble with pencil-thin, grey veining. Structurally, this particular stone also happens to be very consistent between blocks. Small pin holes are common in Bianco Venatino, as well as within other white marbles that are produced in the surrounding area. It is also a softer stone, and may be susceptible to scratching or abrasion. The tile and slab come from different layers in the quarry. Therefore, it is important to note that if both are being used in a project, it is recommended to verify the colors prior to installation. There will be noticeable variations in color and movement between pieces. Therefore, it is important and recommended that a range of this product be viewed before finalizing a purchase. As a natural stone product, it is recommended that it be sealed to extend its longevity. When installing white marble, you must use a white thinset; using grey thinset will leave trowel lines and could stain the marble.
