Giallo Antico is quarried from a pit quarry near Bari, Italy. This stone is quarried in layers like a limestone and will vary in tone depending on the depth each block is extracted from. It is not unusual for this particular marble to have red and dark brown characteristics throughout. It is also a softer stone, and may be susceptible to scratching or abrasion. There will be noticeable variations in color and movement between pieces. Therefore, it is important and recommended that a range of this product be viewed before finalizing a purchase. Due to the qualities of the stone, the slabs are book-matched; meaning slab one and slab two will be cut and polished to create a mirror image of each other. These are then kept in sequence, which allows for a consistent flow in pattern. It is a common characteristic for this stone to have voids in the raw material. Before it reaches the polishing stages, these voids are filled with a polyester resin. Depending on how deep the void is, the resin may shrink as it dries, leaving the surface of the filled area slightly lower than the rest. This does not affect the durability, maintenance or beauty of the stone. Arizona Tile offers Giallo Antico tiles in both polished and brushed finishes to accentuate any design. As a natural stone product it is recommended that it be sealed to extend its longevity.

NSF indicates this product conforms to the requirements of NSF/ANSI Standard 51, thereby meeting the health and sanitation requirements for materials used in areas of food preparation.
