

ARIZONA TILE

ROJO ALICANTE

**STONE TYPE**

Marble

FINISH

Polished

ORIGIN

Novelda, Spain

SIZES

12"x12"x3/8"

RECOMMENDED USES

Commercial
Residential
Interior Floor
Countertops
Interior Wall
Fireplaces
Showers

GEOLOGICAL ERA

Jurassic
(144-206 million years ago)

Rojo Alicante is quarried from a bedrock quarry near Novelda, Spain. The white crystals and veins in this stone are concentrations of white and clear calcite. There will be noticeable variations in color and movement between pieces. Therefore, it is important and recommended that a range of this product be viewed before finalizing a purchase. It is a common characteristic for this stone to have voids in the raw material. Before it reaches the polishing stages, these voids are filled with a polyester resin. Depending on how deep the void is, the resin may shrink as it dries, which will leave the surface of the filled area slightly lower than the rest. This does not affect the durability, maintenance or beauty of the stone. It is also a softer stone, and may be susceptible to scratching or abrasion. Finally, a mesh backing is adhered to the stone. As a natural stone product it is recommended that it be sealed to extend its longevity.
