

ROJO ALICANTE

STONE TYPE

Marble

FINISH

Polished

ORIGIN

Novelda, Spain

SIZES

12"x12"x3/8"

GEOLOGICAL ERA

Jurassic

(144-206 million years ago)

RECOMMENDED USES

Commercial & Residential

Interior & Exterior

Floor & Wall

Backsplashes

Fireplaces

Tub Surrounds & Showers

Vanities

Rojo Alicante is quarried from a bedrock quarry near Novelda, Spain. The white crystals and veins in this stone are concentrations of white and clear calcite. There will be noticeable variations in color and movement between pieces. Therefore, it is important and recommended that a range of this product be viewed before finalizing a purchase. It is a common characteristic for this stone to have voids in the raw material. Before it reaches the polishing stages, these voids are filled with a polyester resin. Depending on how deep the void is, the resin may shrink as it dries, which will leave the surface of the filled area slightly lower than the rest. This does not affect the durability, maintenance or beauty of the stone. It is also a softer stone, and may be susceptible to scratching or abrasion. Finally, a mesh backing is adhered to the stone. As a natural stone product it is recommended that it be sealed to extend its longevity.

NSF indicates this product conforms to the requirements of NSF/ANSI Standard 51, thereby meeting the health and sanitation requirements for materials used in areas of food preparation.

SIZE	PIECES/BOX	SF/BOX	UNITS/PALLET	SF/PALLET
12"x12"x3/8"	10	10	54 boxes	540
