ARIZONA TILE

QT SERIES by Questech

QT-Titanium

The QT Series by Questech is a metal tile series. These tiles are manufactured using a mixture of real premium metal and other materials that are poured into molds. In the curing process, the metal becomes the product surface. The tiles are protected by Q-Seal, a factory-applied permanent sealer that is guaranteed to be water and stain resistant and is anti-microbial, mold and stain resistant. To clean, use any ordinary household cleaner. For best results, we recommend a liquid, non-abrasive cleaner. Liquid abrasive household cleaners should only be used after being tested in a small inconspicuous area to ensure that no damage will result. Do NOT clean with scouring pads, steel wool, or other abrasive implements or damage to the surface may result. Cleaners containing ammonia, bleach or other harsh chemicals should be wiped up shortly after application or damage to the surface may result. To help with cleanup, we recommend covering the tile surface with a high-quality painter's tape before grouting. To avoid scratching the metal, it is recommended to use a non-sanded grout, if grout is used between tiles. It is not recommended to install these tiles in areas fully submerged in water, such as fountains or pools.

High-temperature installations are those where tiled surfaces will be subject to temperatures 130°F (55°C) or greater. Common applications include: Certain kitchen cook tops, fireplace surrounds and steam rooms. Behind cook tops, maintain a minimum distance of 4.5" between tiled surfaces and the heat source. For fireplace surrounds, maintain a minimum distance of 6" from the fireplace opening.
