The Dome series is a color body porcelain. It is the synthesis of digital technology applied to aesthetic research. Contemporary or classic ambiances are imbued by the vibrant surface colors of a collection that excels due to a strong personality as well as a high versatility. The multicolor shades and contrasts of light offer total freedom to create an array of tiling patterns. Because this material is a porcelain product, minimal maintenance is required. Dome is available in five sizes, plus a surface bullnose. It is available in four colors. The five sizes can be used to create a pattern. When installing rectangular tiles 18 inches or longer with a staggered joint, it is recommended that the offset not exceed 33%. This series is suitable for residential and commercial applications.
