The I Quarzi Series is a color body porcelain that is produced to emulate natural quartzite. As a color body porcelain, the color of the tile will bleed all the way through so that the surface color of the tile will also match the body. In the rare instance that the tile may chip, this will help to disguise the blemish. Because this material is a porcelain product, minimal maintenance is required, while sharing similar visual characteristics of natural stone. It is available in four rich, earthy hues, each of which provides high tonal contrasts between pieces. There will be noticeable variations in color and movement between pieces. Therefore, it is important and recommended that a range of this product be viewed before finalizing a purchase.
