**DCOF Rating is a measurement of a tiles frictional resistance. It is the specifier's responsibility to ensure the chosen tile is appropriate for each interior and exterior application.

Calcutta is a porcelain that is produced to emulate natural marble. Because this material is a porcelain product, minimal maintenance is required. To achieve the best range of veining, it is recommended to mix tiles from several boxes at a time during installation. When mixing sizes within a series, shade, texture and calibration differences should be expected. This series is suitable for residential and commercial applications.

For proper bonding, medium bed mortar should be used when installing tiles with a dimensional length greater than 15", and rectangular shape and plank tile, per industry standards. Proper thinset coverage is also necessary, and in some cases, back
