The Club Series is a rectified color body porcelain. It is the synthesis of digital technology applied to aesthetic research. Giving the appearance of a reclaimed, painted barnwood, this series provides the warmth of timeworn matter that has taken on new colors and nuances over time. Because this material is a porcelain product, minimal maintenance is required. Club Series is available in two sizes, 6"x24"x10mm and 6-1/2"x40"x10mm. It is available in four colors. Numerous patterns can be created with the available sizes. Piece to piece variation in shade or color is inherent in all fired clay products; therefore, it is recommended to mix tiles from several boxes at a time during installation to achieve the best range of color. When mixing sizes within a series, shade, texture and calibration differences should be expected. This series is suitable for residential and commercial applications.

For proper bonding, medium bed mortar should be used when installing tiles with a dimensional length greater than 15", and rectangular shape and plank tile, per industry standards. Proper thinset coverage is also necessary, and in some cases, back buttering of tile may be required.

When installing rectangular or square tiles 15 inches or longer with a staggered joint, it is recommended that the offset should not exceed 33%, unless otherwise specified by the manufacturer.
