Icon is a concrete-look porcelain that provides a clean, modern look to any environment. Because this material is a porcelain product, minimal maintenance is required. When mixing sizes within a series, shade, texture and calibration differences should be expected. This series is suitable for residential and commercial applications.

For proper bonding, LFT/LHT mortar for large format and heavy tiles should be used when installing tiles with a dimensional length greater than 15", and rectangular shape and plank tile, per industry standards. Proper thinset coverage is also necessary, and in some cases, back buttering of tile may be required.

When installing rectangular or square tiles 15 inches or longer with a staggered joint, it is recommended that the offset should not exceed 33%, unless otherwise specified by the manufacturer.

SIZE	SF/PIECE	PIECES/BOX	SF/BOX	BOXES/PALLET	SF/PALLET

DCOF rating is a measurement of a tile's frictional resistance. It is the specifier's responsibility to ensure the chosen tile is appropriate for each interior and exterior application.
