The Madrid Series is a glazed porcelain that is produced to emulate old world cotto paver. Because this material is a porcelain product, minimal maintenance is required. It is available in two rich, earthy hues, each of which provides high tonal contrasts between pieces. There will be noticeable variations in color and movement between pieces. Therefore, it is important and recommended that a range of this product be viewed before finalizing a purchase. With a large selection of sizes to choose from, Madrid can easily be laid in a multitude of patterns or a single size layout. Tiles within this series also have detailed edges to add texture to their appearance. This series is suitable for residential and light commercial applications.
