The Misingi Series is a rectified color body porcelain that is produced to emulate natural wood. Because this material is a porcelain product, minimal maintenance is required, while sharing similar, beautiful visual characteristics of a natural wood. Misingi is available in two, plank-style sizes. It is available in five natural hues, each of which provides significant tonal contrasts between pieces, imitating the exceptional qualities of wood. There can be noticeable variances between pieces, so it is important and recommended that a range of this product be viewed before finalizing a purchase. This series is suitable for residential and commercial applications.
