Paros is an Italian made porcelain tile. This geometric line offers four field tile sizes as well as a 2 × 2 mosaic. Available in three solid colors, this line allows your creativity to take over. You can install one color or combine multiple! Because this material is a porcelain product, minimal maintenance is required. When mixing sizes within a series, shade, texture and calibration differences should be expected. This series is suitable for residential and commercial applications.

For proper bonding, LHT/LFT mortar for large format and heavy tiles should be used when installing tiles with a dimensional length greater than 15", and rectangular shape and plank tile, per industry standards. Proper thinset coverage is also necessary, and in some cases, back buttering of tile may be required.

DCOF rating is a measurement of a tile's frictional resistance. It is the specifier's responsibility to ensure the chosen tile is appropriate for each interior and exterior application.

Standard packaging quantities are noted above, but variances may occur.
