*DCOF Rating is a measurement of a tiles frictional resistance. It is the specifier's responsibility to ensure the chosen tile is appropriate for each interior and exterior application.

Terracotta is a rectified porcelain tile. It provides a natural and clean look with the ease of porcelain tile care. It is available in one size, plus a surface bullnose. Because this material is a porcelain product, minimal maintenance is required. This series is suitable for residential and commercial applications. Piece to piece variation in shade or color are inherent in all fired clay products; therefore it is recommended to mix tiles from several boxes at a time during installation to achieve the best range of color.

For proper bonding, medium bed mortar should be used when installing tiles with a dimensional length greater than 15", and rectangular shape and plank tile, per industry standards. Proper thinset coverage is also necessary, and in some cases, back buttering of tile may be required.

When installing rectangular or square tiles 15 inches or longer with a staggered joint, it is recommended that the offset should not exceed 33%, unless otherwise specified by the manufacturer.
