

EARTH SLATE

STONE TYPE

Slate

FINISH

Back Ground &
Natural Cleft

ORIGIN

Markapur, India

SIZES

12"x12"

16"x16"

RECOMMENDED USES

Commercial (vertical application)

Residential

Interior & Exterior

Floor & Wall

Backsplashes

Fireplaces

Tub Surrounds & Showers

Earth is quarried from a pit quarry in Markapur, India. It is a sedimentary stone that is composed mainly of calcite calcium carbonate. This material's dense structure mimics that of natural slate, while the physical components technically classify it as a limestone. Earth lacks iron minerals that have the potential for rusting and is much denser than others, making it one of the few slate products that is suitable for wet area applications. Arizona Tile also offers Earth as a product in our tumbled program, which will include a multitude of mosaics and tile sizes that will provide a more unique style to any design. Earth is manually cut, resulting in a slight variation in size between tiles. Because of this, it is not recommended that it be installed with anything less than a 1/4" grout joint. There will be noticeable variations in color and movement between pieces. Therefore, it is important and recommended that a range of this product be viewed before finalizing a purchase.

SIZE	PIECES/BOX	SF/BOX	UNITS/CRATE	SF/CRATE
12"x12"	10	10	48 boxes	480
16"x16"	6	10.68	24 boxes	256.32

Standard packaging quantities are noted above, but variances may occur.

Please view actual stone when making your selection, as the images on this page are only representative.
