

ALEXANDRIA

STONE TYPE

Travertine

GEOLOGICAL ERA

 Quaternary
 (2 million years ago-present day)

FINISH

Filled & Honed

RECOMMENDED USES

Commercial & Residential

ORIGIN

Turkey

Interior & Exterior

Floor & Wall

Backsplashes

SIZES

18"x18"x1/2"

Fireplaces

Tub Surrounds & Showers

Vanities

Alexandria is quarried from a bedrock quarry in Turkey. This is a sedimentary stone that is formed in hot springs and is composed mainly of calcite calcium carbonate. All travertine stones will have natural cavities, or pits visible in the stone that developed when carbon dioxide bubbles became trapped during the formation of the stone. Prior to honing, this travertine is filled with a color cement to fill in these cavities, and due to varying climate conditions, the color of the fill can differ between shipments. Arizona Tile also offers Alexandria as a product in our tumbled program, which will offer a multitude of mosaics and tile sizes that will provide a more unique style to any design. There will be noticeable variations in color and movement between pieces. Therefore, it is important and recommended that a range of this product be viewed before finalizing a purchase. As a natural stone product it is recommended that it be sealed to extend its longevity.

Alexandria is also available in various tumbled sizes and the Isparta pattern. Please refer to those product information sheets or www.arizonatile.com for more information.

SIZE	PIECES/BOX	SF/BOX	UNITS/PALLET	SF/PALLET
18"x18"x1/2"	N/A	N/A	150 pieces	337.5

Standard packaging quantities are noted above, but variances may occur.

Please view actual stone when making your selection, as the images on this page are only representative.
