

ENGLISH WALNUT

STONE TYPE

Travertine

GEOLOGICAL ERA

 Quaternary
 (2 million years ago-present day)

FINISH

Filled & Honed

RECOMMENDED USES

Commercial & Residential

Interior & Exterior

Floor & Wall

Backsplashes

Fireplaces

Tub Surrounds & Showers

Vanities

ORIGIN

Andes Mountains, Peru

SIZES

12" x 12" x 3/8"

18" x 18" x 3/8"

24" x 24" x 3/8"

3/4" (2cm slab)

English Walnut is a very dense travertine, quarried 8,000 feet above sea level in the Andes Mountains in Peru. The English Walnut quarry is the closest travertine quarry to the city of Lima, which is located about halfway to the top of the Andes Mountains. The only access to the city is through a treacherous winding two-lane road. This is a sedimentary stone that is formed in hot springs and is composed mainly of calcite calcium carbonate. Due to the qualities of the stone, the slabs are book-matched; meaning slab one and slab two will be cut and polished to create a mirror image of each other. These are then kept in sequence, which allows for a consistent flow in pattern. All travertine stones will have natural cavities, or pits visible in the stone that developed when carbon dioxide bubbles became trapped during the formation of the stone. Three days prior to honing, this travertine is filled with a colored cement to fill in these cavities. There can be noticeable variances between pieces, so it is important and recommended that a range of this product be viewed before finalizing a purchase.

SIZE	PIECES/BOX	SF/BOX	UNITS/PALLET	SF/PALLET
12" x 12" x 3/8"	N/A	N/A	400 pieces	400
18" x 18" x 3/8"	N/A	N/A	200 pieces	450
24" x 24" x 3/8"	N/A	N/A	100 pieces	400

Standard packaging quantities are noted above, but variances may occur.

Please view actual stone when making your selection as the images on this page are only representative.
