

TORREON CLASSIC

STONE TYPE

Travertine

GEOLOGICAL ERA

Quaternary
(2 million years ago-present day)

FINISH

Filled & Honed

RECOMMENDED USES

Commercial & Residential
Interior & Exterior
Floor & Wall
Backsplashes
Fireplaces
Tub Surrounds & Showers
Vanities

ORIGIN

Torreón, Mexico

SIZES

12"x12"x3/8"
16"x16"x3/8"
18"x18"x3/8"

Torreón Classic is quarried near Torreón, Mexico. This is a sedimentary stone that is formed in hot springs and is composed of calcite calcium carbonate. All travertine stones will have natural cavities, or pits visible in the stone that developed when carbon dioxide bubbles became trapped during the formation of the stone. Three days prior to honing, the slabs of this travertine are filled with a colored cement to fill in these cavities. During the dry summer months the cement will cure more quickly than it will during the more humid parts of the year. Because of this fluctuation in curing, it is normal for the tone of the fill to differ between seasons. The classic version of a stone will identify it as having more extreme and distinct characteristics. Classic travertine products will have larger, more prominent pits and a higher variation of color between pieces. Therefore, it is important and recommended that a range of this product be viewed before finalizing a purchase.

SIZE	PIECES/BOX	SF/BOX	UNITS/PALLET	SF/PALLET
12"x12"x3/8"	10	10	36 boxes	360
16"x16"x3/8"	N/A	N/A	200 pieces	356
18"x18"x3/8"	N/A	N/A	65 pieces	260
