Fantasy Brown is a beige marble from India with brown detailing. The linear movement in each individual piece of Fantasy Brown contrasts beautifully with its warm white undertones. Fantasy Brown is from northern India and it is such a hard marble, that it needs to be cut using a granite gang saw instead of a marble gang saw. Due to its hardness, it is well suited for kitchen countertop use. During the brushing process for the satin finish, an epoxy resin is applied to the surface of the stone to fill in any natural pits, cracks or fissures that may exist. This does not affect the durability, maintenance or beauty of the stone. It is possible for some of the more minute pits that are too small to effectively hold the resin, to reopen during other finishing stages. However, this will not detract from the overall quality or appearance of the stone. Piece to piece variation in shade or color are inherent in all-natural stone products; therefore, when installing natural stone tile, it is recommended to mix tiles from several boxes at a time during installation to achieve the best range of color. When installing white marble, you must use a white thinset; using grey thinset will leave trowel lines and could stain the marble. As natural stone products, it is recommended that these be sealed to extend their longevity. It is also recommended that the stone be sealed before grouting.
