Classico is a polished agglomerate marble comprised of a white resin background embedded with grey marble chips. The look of this agglomerate marble adds vintage flair to any installation.

The term "agglomerate" means to collect or gather into a cluster or mass. In production, small chips of marble are tumbled to round the sharp edges. The marble chips are then combined with resin and placed into a large rectangle tank to be cured into a block. The block is later cut into 3/4 inch slabs or 1/2 inch thick slabs to be cut into tile. As a product containing natural stone, it is recommended that it be sealed to extend its longevity.

Beyond interior countertops, agglomerate slabs can also be used on interior and shower walls.

Classico is also available in a 24 × 24 × 1/2 tile.
