Silver Cloud Satin is a granite quarried in a bedrock quarry in India. The color scheme of this granite is a blend of black and white minerals arranged in layers with a lot of movement to make this an interesting addition to any installation.

Due to the qualities of the stone, the slabs are book-matched; meaning slab one and slab two will be cut and finished to create a mirror image of each other. These are then kept in sequence, which allows for a consistent flow in pattern. Finally, a mesh backing is adhered to the back of the stone to ensure safety while handling and fabricating the slab or tile. As a natural stone product, it is recommended that it be sealed to extend its longevity.
