

**PRODUCT TYPE**

Granite

**ORIGIN**

Brazil

**STOCKED FINISH**

Polished

**RECOMMENDED USES**

Commercial

Residential

Interior Countertops

Interior Wall

Fireplaces

Shower Walls

Steam Showers

**STOCKED SIZES**

3/4" (2cm slab)

1-1/4" (3cm slab)

**Limited Availability:** Please contact your local Arizona Tile location.

Viridian is a polished granite from a bedrock quarry in Brazil. A blend of light neutral tones of cream, gold and soft blue green with contrasting dark brown veining makes this granite visually interesting while still versatile.

During the polishing process, an epoxy resin is applied to the surface of the stone to fill in any natural pits, cracks or fissures that may exist. It is possible for some of the more minute pits that are too small to effectively hold the resin, to reopen during other finishing stages. However, this does not affect the durability, maintenance or beauty of the stone. Due to the qualities of the stone, the slabs are book-matched; meaning slab one and slab two will be cut and polished to create a mirror image of each other. These are then kept in sequence, which allows for a consistent flow in pattern. Finally, a mesh backing is adhered to the back of the stone to ensure safety while handling and fabricating the slab or tile.

As a natural stone product, it is recommended that this be sealed to extend its longevity. Natural stone may absorb moisture during fabrication and from installation materials. Therefore, it is recommended that sealing should be done after the stone has fully dried to ensure proper sealer absorption, and prior to consumer use. Drying time will vary depending on the stone, as well as the temperature and humidity level. After sealing, allow it to cure completely. Arizona Tile suggests using a solvent-based impregnating sealer for the initial sealing.
