GEOLOGICAL ERA

Jurassic
(144-206) million years ago

Calacatta Umber Honed is quarried in a bedrock quarry. As a result of the severe winter in this area, the quarry is shut down for four to five months each year. Calacatta Umber Honed has a clean, white background with darker veins. Due to the qualities of the stone, the slabs are book-matched; meaning slab one and slab two will be cut and polished to create a mirror image of each other. These are then kept in sequence, which allows for a consistent flow in pattern. As a natural stone product, it is recommended that this be sealed to extend its longevity.
