

# ARIZONA TILE

# PERLATO TAJ SATIN

## PRODUCT TYPE

Quartzite

## ORIGIN

Brazil

## STOCKED FINISH

Satin

## RECOMMENDED USES

Commercial

Residential

Interior Countertops

Interior Wall

Fireplaces

Shower Wall

## STOCKED SIZES

3/4" (2cm slab)

Perlato (Italian for pearly) Taj Satin is a quartzite from a bedrock quarry in Brazil. The stone offers a blend of creamy beige, warm gold and soft grey tones which make this ideal in traditional as well as contemporary spaces. This is a metamorphic stone which evolved from a sandstone due to extreme heat and pressure. During the brushing process, an epoxy resin is applied to the surface of the stone to fill in any natural pits, cracks or fissures that may exist. It is possible for some of the more minute pits that are too small to effectively hold the resin, to reopen during other finishing stages. However, this does not affect the durability, maintenance or beauty of the stone. Due to the qualities of the stone, the slabs are book-matched; meaning slab one and slab two will be cut and brushed to create a mirror image of each other. These are then kept in sequence, which allows for a consistent flow in pattern. Finally, a mesh backing is adhered to the back of the stone to ensure safety while handling and fabricating the slab.

As a natural stone product, it is recommended that this be sealed to extend its longevity. This quartzite has a more open structure and therefore needs a sealer that is designed to penetrate properly to ensure that the stone is sealed. Arizona Tile suggests using three coats of Miracle Sealants 511 Porous Plus or Dry Treat Premium Impregnating Sealer for the initial sealing, which needs to be done at the time of installation and applying one coat of sealer every six months moving forward. It's also recommended to seal all cut edges before installation. This will help prevent water and oils from penetrating into the stone around sinks, faucet holes, ovens and any seams.
