Palladio Doge is an agglomerate marble created by using chips from a Bianco Carrara marble quarry. The term "agglomerate" means that it is comprised of small pieces of stone, fused together using resin. Therefore, it possesses similar characteristics of marble. In production, small pieces of Bianco Carrara marble are tumbled to round the sharp edges. These are then combined with white resin and placed into a large rectangle tank to be cured into a block. The block is later cut into 3/4" thick slabs. Palladio Doge slabs can be used for countertops, Shower Walls, tub decks, and steam Shower Walls. With matching 24 x 24 tile, this agglomerate marble brings a contemporary look to bathrooms and family living areas alike. As a natural stone product it is recommended that it be sealed to extend its longevity.
