ARIZONA TILE

DESERT CANYON SATIN

PRODUCT TYPE
Granite

STOCKED FINISH
Satin

STOCKED SIZES
3/4" (2cm slab)
1-1/4" (3cm slab)

ORIGIN
Brazil

RECOMMENDED USES
Commercial
Residential
Interior Countertops
Interior Wall
Fireplaces
Shower Walls

Desert Canyon Satin is quarried from a bedrock canyon in Brazil. This granite will range from brown and gold, to blue and gray, all within the same slab. Every shipment will be unique in its look and can also change within the bundle. Over millions of years, water has penetrated deep into this stone through small cracks and fissures, causing the iron oxide and other minerals to oxidize. It is this process that produces the rich, vibrant gold tones that are visible in this stone.

During the finishing process, an epoxy resin is applied to the surface of the slab to fill in any natural pits, cracks or fissures that may exist in the stone. This does not affect the durability, maintenance or beauty of the stone. It is possible for some of the more minute pits that are too small to effectively hold the resin, to reopen during other finishing stages. However, this will not detract from the overall quality or appearance of the stone. Due to the qualities of the stone, the slabs are book-matched; meaning slab one and slab two will be cut and finished to create a mirror image of each other. These are then kept in sequence, which allows for a consistent flow in pattern. Finally, a mesh backing is adhered to the back of the stone to ensure safety while handling and fabricating the slab.

As a natural stone product, it is recommended that this be sealed to extend its longevity. Natural stone may absorb moisture during fabrication and from installation materials. Therefore, it is recommended that sealing should be done after the stone has fully dried to ensure proper sealer absorption, and prior to consumer use. Drying time will vary depending on the stone, as well as the temperature and humidity level. After sealing, allow it to cure completely. Arizona Tile suggests using a solvent-based impregnating sealer for the initial sealing.

Product selection varies at each location. Please contact your local Arizona Tile for product availability.
Please view actual stone when making your selection, as the images on this page are only representative.
