Fantasy Brown is a marble from northern India. Fantasy Brown is such a hard marble, that it needs to be cut using a granite gang saw instead of a marble gang saw. Due to its hardness, it is well suited for kitchen countertop use. The diagonal movement in this marble, the brown veining, plus the off-setting cream and white tones give this material a dramatic look. It is a common characteristic for this stone to have voids in the raw material. Before the stone reaches the polishing stages, these voids are filled with a polyester resin. Depending on how deep each void is, the resin may shrink as it dries, which will leave the surface of the filled area slightly lower than the rest. This does not affect the durability, maintenance or beauty of the stone. Due to the qualities of the stone, the slabs are book-matched, meaning slab one and slab two will be cut and brushed to create a mirror image of each other. These are then kept in sequence, which allows for a consistent flow in pattern. A mesh backing is adhered to the back of the stone to ensure safety while handling and fabricating the slab. As a natural stone product, it is recommended that this be sealed to extend its longevity.
