Fireplaces
Shower Walls
Shower Floors

These pebbles are a product of nature, therefore there can be noticeable variances between pieces, so it is important and recommended that a range of this product be viewed before finalizing a purchase. Piece to piece variation in shade or color are inherent in all natural stone products; therefore, when installing natural stone tile, it is recommended to mix tiles from several boxes at a time during installation to achieve the best range of color. A mesh backing is adhered to the back of the stone.

*It is possible that Flat Pebble can have rust or oxidation spots from time to time. These rust spots are from the small amount of iron in the stone. It's recommended that Flat Pebble be sealed to help reduce the amount of moisture that can get into the stone.

**When installing white stone you must use a white thinset. Using grey thinset will leave trowel lines and could stain the stone. It is recommended that this product be sealed to extend its longevity.
