(Interior use only)

The Calacatta Royale marble has a backdrop of creamy white with bands of soft grey, pale gold and light brown. Once installed, the organic variations create a beautiful and luxurious environment.

There can be noticeable variances between pieces, so it is important and recommended that a range of this product be viewed before finalizing a purchase. Piece to piece variation in shade or color are inherent in all natural stone products; therefore, when installing natural stone tile, it is recommended to mix tiles from several boxes at a time during installation to achieve the best range of color. When installing white marble, you must use a white thinset. Using grey thinset will leave trowel lines and could stain the marble. As a natural stone product, it is recommended that this be sealed to extend its longevity.
