When installed in interior wet areas, the product must be sealed and maintained properly. If it is not, the appearance of the product could be altered. Please contact your installer or sales representative for more information.

Spanish Grey, quarried from a bedrock quarry, is a creamy taupe toned marble with a honed finish. It is a softer stone, and may be susceptible to scratching or abrasion.

Piece to piece variation in shade or color are inherent in all-natural stone products; therefore, when installing natural stone tile, it is recommended to mix tiles from several boxes at a time during installation to achieve the best range of color. As a natural stone product it is recommended that it be sealed prior to grouting to extend its longevity.
